Security America Announces Key Leadership and Staff Promotions to Support Continued Growth

Security America is pleased to announce several key leadership and staff changes that took place in July designed to strengthen operations, enhance client service, and support the company's continued growth.

The company has hired Jarrod Burdette as Director of Operations, promoted Van Workman to Field Manager, and transitioned Tina Campbell into the newly created role of Marketing & Technology Specialist. These changes reflect our commitment to investing in outstanding leadership and positioning Security America for the future. Jarrod, Van, and Tina each bring valuable experience and dedication to their new roles, and we're excited about the positive impact they will have on our employees, clients, and the communities we serve.
